Department of Agriculture

Report

Kisan Mela, PAU

Department of Agriculture planned a visit to PAU Kisan Mela for the students of B.Sc Agriculture Semester-VII on 21st sept, 2019. 45 students were part of this visit. The programme was funded by “Ministry of Science and Technology under DBT Star College Scheme”.

Group of students before leaving for PAU Kisan Mela

The main objective of the visit was to introduce the students with the machinery, latest inventions and technology (agriculture), new varieties of crops and seeds etc. Students and the faculty purchased the seeds, nursery, implements, ready to eat products, handcart items and agriculture related literature.

The display of new seeds and handcraft in Kisan Mela

The KVK's across Punjab also exhibit their annual research work such as new varieties, new implements, crop related problems and their solutions. Students learned about newly discovered pathogens and ways to combat them. Students gained practical knowledge of the working of agricultural implements and machineries e.g. Combine harvester with super sms technology, happy seeder, chopper, high clearance tractor for spraying purpose, rotavator and laser leveler etc.
