

## World Wetland Day Celebration (02.02.2024)

The P.G. Department of Botany, SGTB, Khalsa College, Sri Anandpur Sahib, celebrated World Wetland Day on 02.02.2024. On the occasion, Dr. Ravi Kant and Dr. Sartaj Singh highlighted the significance of Wetlands citing suitable examples. They told the students that a wetland is a distinct ecosystem that is flooded or saturated by water, either permanently or seasonally for a shorter period, categorised as Marshes, Swamps, Bogs and Fens on the basis of their characteristic features, known for their specific flora and fauna, are highly productive and biologically diverse systems that enhance water quality, control erosion, improve water quality, sequester carbon, and provide home to at least one third of all threatened and endangered species.
