

Industrial visit to Primo Chemicals Limited, Naya Nangal

The Department of Chemistry, Sri Guru Teg Bahadur Khalsa College, Sri Anandpur Sahib, Punjab, organized a one day Industrial Trip to the Primo Chemicals Limited, Naya Nangal, Punjab, for graduation and post-graduation students (a total of 40 students) on March 19, 2024. The industrial visit was organized for chemistry students to provide them with practical insights into the operations and processes involved in chemical manufacturing units. The visit aimed to enhance their understanding of theoretical concepts learned in the classroom and to expose them to real-world applications. The students were guided through the well equipped laboratories where they observed various analytical techniques and quality control measures employed to ensure the purity and potency of chemicals. Students learned about the different stages involved in chemical manufacturing like preparation, purification and safe disposal of waste material.
