

Educational Talk  
**National Space Day Celebration**  
August 23, 2024

On the occasion of National Space Day, an insightful educational talk was conducted by Dr. Vimal Mehta, Dr. Deep Shikha, and Dr. Amrit Singh for the B.Sc. and M.Sc. students under DBT scheme. The session was aimed to inspire and educate students about the vast and fascinating field of space science.

National Space Day is a significant event that underscores the importance of space exploration and the contributions of various scientific advancements to our understanding of the universe. It serves as a reminder of the endless possibilities that space science offers and the role it plays in pushing the boundaries of human knowledge and innovation.

The event was further enriched by the involvement of Vijnana Bharti (VIBHA), an esteemed organization dedicated to the dissemination of scientific knowledge among students. VIBHA's role in promoting science education is crucial, as it bridges the gap between academic knowledge and real-world scientific applications. Through initiatives like this, VIBHA continues to empower students with the knowledge and inspiration needed to contribute to the ever-evolving field of science.

The talk was concluded with an interactive session where students had the opportunity to ask questions and engage directly with the experts, making the event both educational and inspiring.
